Frequency: Annual

Oregon's wine industry highlights

. In 1998, 102 wineries crushed 13,265 tons of grapes, 29 percent less than from the 1997 vintage and mirroring the smaller grape harvest.

. Cooperage capacity continued to grow, increasing 3 percent from the prior year.

. Sales during 1998 totaled 8 percent more than in 1997.

. Wine inventory on January 1, 1999 was up 28 percent from a year earlier, totaling over one million cases for the first time.

Inventory includes both bottled case goods and gallons of bulk storage converted to case equivalents. Grape wines from the 1997 vintage, plus fruit and berry wines made in 1997 were the most recent included. The inventory figures include bonded and tax-paid inventory, regardless of location within Oregon, owned by wineries.

Wineries reported unfilled grape crushing needs of 1,537 tons in 1998. Reported needs were: Pinot Noir, 996 tons; Merlot, 139 tons; White Riesling, 131 tons; Pinot Gris, 91 tons; Chardonnay, 39 tons; Cabernet Sauvignon, 31 tons; Gewurztraminer, 22 tons; Pinot Blanc, 22 tons; Muller Thurgau, 20 tons; Semillon, 2 tons; and all other varieties, 44 tons.

Funding for this report was provided by the Oregon Wine Advisory Board.

Non-grape wine summary

Eight wineries produced approximately 25,000 gallons of non-grape wines, not including hard apple cider which is taxed as a wine product. Blackberries, raspberries and loganberries were the leading fruits used for these wines. Other fruits used for wines by commercial wineries in 1998 were mainly currants, rhubarb, boysenberries and peaches. This summary includes estimates for incomplete responses.
