January 21, 2000/REVISED JULY 7, 2000

Frequency: Annual

## Wine grape value of production sets record

The Oregon 1999 wine grape crop totaled 17,900 tons, up 22 percent from 1998 and second only to the 1997 record of 18,500 tons. Production value was \$23.4 million, a record high and 34 percent above 1998. Value per ton also established a record high at \$1,300 per ton, up \$120 per ton from a year earlier. Yield per acre was about average though some production was lost due to frost. Two varieties, Pinot Noir and Pinot Gris accounted for 300 more harvested acres this year. However, 200 fewer acres of Chardonnay were harvested. Syrah and Cabernet Franc acreages show significant new plantings although still included in "all other" varieties. Funding for the 1999 survey was provided by the Oregon Wine Advisory Board.

### Wine Grapes: Acreage, yield, production, price and value, by variety, Oregon, 1998-99

Variety	All planted acreage		Harvested acreage		Yield per harvested acre		Production		Price per ton		Value of production

**Phylloxera-resistant rootstocks in wine grape vineyards, Oregon, 1999**

Shown here is the result of the question on phylloxera-resistant rootstock use in Oregon in 1999. Growers choosing to report on this question accounted for 71 percent of the total wine grape acreage. Rootstocks in the Other category were mostly unidentified. Other category identified rootstocks include 1616, 5 C, 109, 110 R, 161-49, and Paulson.

Rootstocks	Percent of Total
Self-rooted	67.9
<b>Phylloxera-resistant</b>	
101-14	7.8
3309	14.3
420 A	0.8
44-53	0.7
5 C	1.8
