Southern Oregon University Research Center, "2012 Oregon Vineyard and Winery Census Report" (2013). *Oregon Wine Board Documents*. Report. Submission 2.  
[http://digitalcommons.linfield.edu/owha\\_owb/2](http://digitalcommons.linfield.edu/owha_owb/2)

This Report is brought to you for free via open access, courtesy of DigitalCommons@Linfield. For more information, please contact [digitalcommons@linfield.edu](mailto:digitalcommons@linfield.edu).

Growth was seen in nearly all aspects of the Oregon wine industry in 2012 (see footnote). The number of vineyards grew to 905 with planted acreage increasing 25% over 2011. While the average yield per acre declined slightly, total production was up 21% due to more acreage coming into harvest and less fruit not being harvested. Price per ton averaged statewide rose by 19% and, in combination with greater production, resulted in a 42% increase in total crop value. The number of "all" wineries, including TTB-bonded and OLCC Grower Sales Privilege and Winery license holders, increased from 463 to 545 in 2012. The number of wineries crushing grapes increased from 350 in 2011 to 379 in 2012, an increase of 29 wineries. The total amount crushed from the 2012 vintage is estimated to be 51,364 tons, up 22% over the lighter 2011 vintage. Case sales, including domestic and export sales, are estimated to have increased 17% from 2011 to 2012, while the total dollars for all wine sales are estimated to have increased by 13% to over 300 million dollars for the first time.

\* Note that some differences in reported values over the last few years are expected due to the shift from the USDA to SOURCE conducting the census. For example, some of the 2012 growth in number of wineries, production and sales is likely attributed to a more comprehensive identification of Oregon wineries, potentially correcting underestimates in past years.

**Vineyard Section:**

**Wine grapes: Acreage, yield, production, price and value, variety, Oregon, 2011-2012<sup>1</sup>**

<sup>1</sup> Includes estimates for incomplete responses.

<sup>2</sup> Price per ton is a weighted average of price received by Oregon grape growers.

<sup>3</sup> Value of production is derived by multiplying quantity times price, rather than the summation of value by variety.

<sup>4</sup> Totals may not add due to rounding.

**Wine grapes: Vineyards, acreage, yield and production by growing area, Oregon, 2011-2012<sup>1</sup>**
