USDA, NASS, Oregon Field Office

Oregon wine grape production was down 22 percent in 2010. Production of grapes from Oregon vineyards fell to 31,200 tons, the lowest level since 2005. Decreased wine grape production was attributed to a variety of reasons including poor fruit set for some growers, a very cool growing season, mold, birds, and deer. The average yield per harvested acre was down to 1.85 tons. Planted acreage in 2010 increased to over 20,000 acres for the first time.

Oregon showed a net increase of 14 vineyards in 2010 to 849. The number of wineries crushing grapes in Oregon increased to 315, a net increase of 40. Case sales of Oregon wine increased a healthy 16 percent in 2010. Wine sales in dollars followed with an increase of 26 percent from 2009. Funding for this annual survey is provided by the Oregon Wine Board.

Wine grapes: Acreage, yield, production, price and value, by variety, Oregon, 2009-2010

Variety	All planted acreage		Harvested acreage		Yield per harvested acre		Production		Price per ton ¹		Value of production

¹ Price per ton is a weighted average of prices received by Oregon grape growers and prices paid by Oregon wineries.

² Totals may not add due to rounding.

³ Value of production is derived by multiplying quantity times price, rather than the summation of value by variety.

Wine grapes: Vineyards, acreage, yield and production, by county, Oregon, 2009-2010
