INSIDE LINFIELD MAGAZINE

Budding scientists get an in-depth look at biology, chemistry, physics and math through iFOCUS, an innovative program launched at Linfield three years ago. We take a close look at the program to understand how young scientists benefit throughout their college careers. Also in this issue, we feature a successful businessman who is fulfilling a goal of completing his degree and we introduce you to an economics professor who has made an indelible impression on his students. An alumnus shares the joy of working in children's theatre and five students describe the value of their summer internship experience. We also salute our alumni with a look at the 2014 homecoming celebration. The Linfield Experience continues to thrive – read on for more stories.
