Telling Time

*On a sunny day, the copper and stainless steel sundial glistens over Murdock Hall, a tribute to two men, one a mathematician and the other an artist. One of the late Winthrop W. Dolan's many fascinations was in measuring time without mechanics. In 1975, not long before he retired, he published *A Choice of Sundials*. In his honor, the late art Professor Nils Lou designed the sundial in 1993 to commemorate Dolan's interest and many contributions to Linfield. A little bit of art, a little bit of whimsy and a little reminder of two men who made great contributions to Linfield. We only need to look up, especially on a sunny day.*

*The aims of scientific thought
are to see the general in the
particular and the eternal in
the transitory.*
