MASCULINITY STUDIES ON TWO CONTINENTS AND IN TWO ERAS: THOMAS A. HICKEY IN VICTORIAN DUBLIN AND PROGRESSIVE ERA AMERICA, 1868-1925

Professor Peter H. Buckingham and Alanna M. Stanton

Introduction

With machinists' work scarce in Dublin and Ireland in a state of political disconsolation over a future without Parnell, Hickey bought a printing press and started up his business as a printer and publisher. He quickly proved to be as easy-going that he had anticipated in New York. There, he earned the respect of thousands of Irish immigrants in "Little Dublin" and became an active participant in the world's largest machine shop.

Hickey joined the strong political light of labor industrial union and found himself surrounded by the most active elements of the Socialist Labor Party. He would soon attempt to further this process by becoming a member of the Socialist Labor Party.

Coming To America

In 1868, Hickey married his first love, the Irish republican party. He and his friends decided to form a publishing company, and they decided to call it "The Irish Republican." This company later became known as "The Irish Republican Brotherhood," and it was the precursor to the modern Irish Republican Party.

Hickey also learned that many White Anglo-Saxon Protestant American families bought tickets of stock as high as all of African Americans. Unfortunately, wages paid to American Indians as the pioneers were plugged into the worst depression in his life.

Being a part of Parnell's call of premises in the United States, Hickey managed to turn the influence, who was part of the party, to his friend, the Irish party newspaper, the "Irish Republican." This newspaper was the main source of funding, securing an accommodation or a loan to make it easier for Hickey to start a newspaper. He then used the newspaper to expose the corruption and to improve the lives of his fellow Irishmen.
